INTRODUCTION

On behalf of the Programme Committee, we are delighted to present the British Cardiovascular Society Annual Conference 2024, which will be held at Manchester Central from 3-5 June 2024. We would like to thank you for taking this opportunity to exhibit.

The British Cardiovascular Society Annual Conference is the UK's leading and largest cardiovascular event, offering a variety of opportunities to showcase your company, products and initiatives to an audience of over 2,000 healthcare professionals in the field of cardiology. Predominantly consultant and trainee cardiologists, delegates also include nurses, cardiac physiologists and scientists.

As well as a full programme of informative lectures delivered by an international Faculty, the Exhibition Hall now hosts interactive learning opportunities throughout the duration of the conference. These learning opportunities include simulators and hot topics. Year on year we endeavour to improve the programme of educational activities and also introduce something 'a bit different' to keep your interest over the three days!

Please find within this Exhibitor Manual all of the relevant information that you will need prior to and during the conference. Please read this document and complete the relevant forms to ensure that you do not miss any key deadline dates or any other information which may be of importance to your planning and attendance at the meeting.

Should you require any further information, please do not hesitate to contact the BCS 2024 Conference team. We very much look forward to welcoming you to Manchester!

The remainder of the wall may be permitted to be clear safety or tempered glass or a Perspex derivative, but only following approval from the organisers.

Stand plans showing the floor and elevation measurements must be sent to the Organiser and Health and Safety Contractor as per the Exhibitor Manual.

Please note: A "Space only" stand does not include walling, power, floor covering or furniture. Sufficient walling must be provided to ensure all cabling is concealed. For "Space only" stands with platforms, please ensure exposed corners are rounded/splayed where adjoining a gangway.

All persons working within the Exhibition Hall during full CDM build up and break down timescales are **required to complete appropriate site induction** and Manchester Central now requires that only regulatory yellow or orange hi-vis should be worn in the Halls during periods of Build Up or Breakdown of the exhibition. Safety footwear is always advised but a strong soled shoe with ankle support can be worn at your own risk (Exhibitors only). This does not apply to periods of "soft build and soft breakdown" as identified within this Manual or to Contractors who are required to wear safety footwear during periods of build and breakdown.

This is to assist in the safety of contractors, organisers and Manchester Central staff during what can potentially be a particularly hazardous environment. Please note that the Organisers will not have a supply of hi-vis vests. These can be purchased at the Venue's concierge desk in the Central Foyer.

It is predicted that on the majority of occasions, exhibitors will not be required to wear a high visibility vest as by the time they are scheduled to have access to the hall, hazardous activity should be complete but they will be required to wear them during the breakdown if it is their intention or requirement to stay on site beyond the permitted 1-hour time slot allocated for "soft breakdown at the close of the Exhibition on 5th June.

This is in addition to appropriate protective wear (for example hard hats, steel toe/appropriate footwear etc.). CDM (Construction, Design and Management) Regulations 2015 were implemented within the exhibition and conference sector on 6th April 2016. They do not replace any existing legislation but are intended to provide a framework to help you ensure that your stand is constructed safely and help you understand your obligations.

These documents should be viewed as a summary for meeting minimum requirements and should at all times be used in conjunction with the Health and Safety at Work Act 1974, HSE's exhibition specific guidance on CDM2015 and also the HSE's official L153 guidance on CDM.

Welfare Arrangements

The majority of requirements required through CDM are already in place at most major UK Venues and this information will be detailed on the Site Rules & Information (Project Management Form) which will be provided to all space only contractors as part of the site induction process:

- Access to toilets, seating, drinking water and a retail food outlet or alternative source of food will be documented within this piece of information.

Over and above that, you should ensure that the Welfare of the team carrying out the construction is planned for. Think about:

- Working hours
- Equipment required

During the Hard Breakdown, regulatory yellow or orange hi-vis and appropriate footwear must be worn in accordance with mandatory CDM Regulations.

Please be advised that contractors at this Event must wear hi-vis vests and safety footwear where they are involved in manual handling and construction unless their own Event Risk Assessment indicates that other engineering controls have been introduced which only require "appropriate footwear" to be worn or if the contractor has a medical exemption letter from their GP confirming the wearing of safety footwear is detrimental to their foot health. In such circumstances, contractors will be required to complete a disclaimer on site confirming their own personal liability should an accident/injury occur as a direct consequence of not wearing 'safety footwear'. Please be advised that requests for the non-wearing of safety footwear for no reason other than "they are not comfortable" will not be granted especially if their employing Company stipulates the wearing of safety footwear within their individual Risk Assessment.

Vehicles and Pedestrian Routes

It is difficult to completely separate vehicle and pedestrian routes during an event build-up and breakdown. However, there may be designated operational forklift lanes which will be in use at specific times and will be identified on site. It is imperative that all space only contractors working adjacent to the lanes ensure that their stand materials/equipment do not jeopardise or infringe upon clear movement in these areas. Additionally, please be clear with any staff that you are bringing on site that care should be taken at all times.

If your teams are operating in loading areas they should be aware of the movement of traffic and should wear hi-visibility clothing as a minimum. Where you are able to drive a vehicle within the event perimeter your driver should be made aware that pedestrians have right of way AT ALL TIMES and there will be speed restrictions in place.

Whilst every endeavour is made to secure the halls during build-up and breakdown we would ask that all exhibitors are extremely vigilant whilst the access doors are open and always ensure that someone is on the stand at all times.

No goods should be left unattended at any time. Neither the Organisers nor Manchester Central can accept any responsibility for any loss or damage.
